Product Information

WPC is a composite material made of wood flour and plastics like PVC. They are substitute of wood which looks and works like a wood.

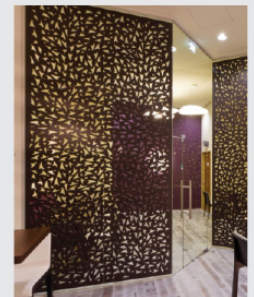

WPC Boards offered by us are :

PVC white foam boards : This is the most common of PVC boards. These boards are more often used in its natural white form for interior and exterior applications.

WPVC Foam Boards : This is the new form of PVC board with wood fibers added. It is a substitute of wood, plywood, MDF and particle board in several direct applications.

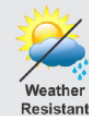

WPC board is a new generation product for young architects. They are absolute green product by means of recyclability, zero emission, clean and hygienic product. Available in different density range - application vide.

WPC panels and boards are a lifetime investment product.
